NEW MAKO CTP SOLD IN KANO STATE

The latest Mako 800 CTP System, along with an Agfa Lithostar plate-setter has been sold to Clear Impressions Ltd of Kano State. Mr Ibrahim Yahya attended a demonstration of the Mako system installed at Academy Press, Lagos and was impressed with its ease of use and robust build quality.

The MAKO 800 introduces the latest advances in optical technology which produces a smaller and harder dot on the plate. The result is high quality plate imaging with the lowest operating cost in the industry.

The MAKO 800 was engineered to image all formats for 2, 4, 6 and 8-page signatures with resolutions from 1800 dpi to 3556 dpi. With a maximum format of 32.4" x 45.0" (824mm x 1143mm) and production speeds up to 20 Speedmaster 102 plates per hour, the MAKO 800 keeps multipress environments efficient through flexible, fast and trouble-free performance.

Mr Ivor Hutchinson and Mr Chris Broomfield of Hambleside International both attended the demonstration in Nigeria and were also pleased to negotiate a package of consumables to compliment the machinery order.

STOP PRESS...ECRM have very special offers on MAKO 4 & 8 factory refurbished machines, please contact us for the best prices.

For further information on the MAKO CTP system please contact Hambleside International.

NEW YEAR NEW ADDITIONS

We would like to welcome the latest member to the team, Mr Chris Broomfield with 20 years of the printing industry in both a technical capacity and with an export background dealing in over 25 countries.

Chris will be concentrating on the important Nigerian and Ghanaian markets and will be a regular visitor to the region.

Call or e-mail Chris to arrange a meeting to discuss your business printing needs.

Foliant Laminator

Model shown is the Foliant Gemini C400 with suction high pile feed and jogger on delivery

Hambleside International are pleased to present the Foliant range of laminators, made in Europe for over 10 years they are manufactured to a high standard and are available from a basic table top unit up to a fully automated BI sheet size. The most popular model is the Gemini 400 range, laminating single sides at a production rate of up to 1800 sheets per hour. Each model is available as an operator hand fed unit or as a fully automatic suction pile feed machine with a jogger on delivery. The unit has a built in Becker pump and runs on a 240v domestic electrical supply.

We have good experience of this machine and have found them extremely reliable, versatile and operator friendly. Installation of a fully automatic machine typically takes one day including operator training and we are also able to offer in house technical support and spare parts as well as a range of films.

The entire range is extremely flexible able to laminate a range of stock starting from 115 gsm up to 350 gsm. Foliant laminators are easily able to work with stock produced on sheet fed litho presses as well as work produced digitally.

Please contact us with your enquiries on this affordable range of machinery that will add the quality and professional finish to all your printing jobs.

AUTOPRINT Why buy a used press when you can afford new?

With over 7000 machines installed in over 42 countries since 1993 Autoprint have gained a reputation for building affordable and versatile equipment. Built in an ISO:9001 environment you can be assured that each machine is built to a high standard and ready for non-stop operation. Utilising the latest manufacturing techniques along with ease of operation and servicing Hambleside are proud to partner Autoprint products.

Some examples of the most popular machines Autoprint offer are:

- Colt – Single Colour Press (380 x 254mm Sheet Size)
- Knight – Single Colour Press (380 x 508mm Sheet Size)
- PTP – Pack to Pack 2 colour
- Finecoat – Automatic Aqueous UV Coater
- Alca Gamut – Rotary Labelling Machine

The latest addition to the range is Autoprint Dion 450 - a Four Colour sheet-fed offset printing machine - incorporating sophisticated features and top-of-the-line specifications. Inspired by the over 6900 customers of Autoprint, this machine is the perfect solution for short-medium run four colour jobs. It offers exceptional print quality with its 15 Inking Rollers on each colour head.

The Kompac Automatic Dampening System from USA not only ensures consistent print quality, but also acts as an additional inking unit to further enhance the print results....all of this at a price that will beat any second hand machine you will find. With on the ground support in Lagos it is well worth considering these low cost and high quality machines in favour of an aged second hand KORD or MO-E.

Model above is the Dion 250 two colour press also available as an affordable 4 colour machine

Please contact Hambleside for further information and a quotation that will leave you wondering why you considered second hand machinery before.

Need MACHINE PARTS Fast?

Locating spare parts for your printing machinery need not be a problem. We know that machinery down-time costs you money. So at Hambleside we aim to turn around your urgent spare-part orders within 48 hours of the order being confirmed - as long the parts are available from the manufacturer. They are dispatched by Courier, and because we export such high volumes of goods and equipment, they provide us with really competitive rates so that you pay the absolute minimum for your urgent consignments. When ordering parts it is essential that you give us as much information as possible including the part number. If you give us accurate information at the beginning, the quicker we can locate the parts to get you back in production.

STOP PRESS...

ECRM have just announced as we go to press with this edition of Imprint that they are launching a digital press.

The DPP 1200 digital production press is positioned to deliver commercial quality colour output to meet the demands of commercial printers and others graphic arts service providers.

This new and innovative digital printing solution can economically supplement their current print offerings with a digital press that easily meets most short run print requirements. The DPP 1200 quickly and professionally will produce high-quality colour runs of business cards, posters, brochures, magazine covers and much more in line screens up to 175 lpi.

We hope to have the first pictures and specifications of this exciting launch in the next edition of Hambleside's Imprint.
