Developing Market – Flexo Web

Model shown is the Edale Alpha 250, 4 colour flexo press.

Edale are the UK based manufacturer of narrow web printing presses and converting equipment specialising the dedicated market sectors; Flexographic Printing, Digital Printing, Commercial Security and Converting Solutions. The machines are designed and manufactured in the UK and over the last ten years Edale have grown and developed their technological capabilities with an impressive record of innovation, ensuring they are a truly 21st century company.

With over 150 installations worldwide, the award-winning Alpha is Edale's compact flexographic printing press. With so much success but a higher demand in the market place, the 'Multi' has been added to the range. **Continued....**

MEETING THE INDUSTRY

Hambleside International's UK managers frequently travel to West Africa to support our local representatives and conduct visits to customers print houses.

We also offer invitational Open House meetings where we present our latest news and offer our industry knowledge to the assembled delegates in an informal and friendly environment.

On occasion we will have representatives from the manufacturers on hand to present their product range and to answer your questions.

If you would like to receive news or to attend our forthcoming Open House events, please email export@hambleside.co.uk

We look forward to seeing you at our next event.

Main Features

Edale Alpha 250

ECRM DPP 1200

Foliant Orpheus C530

The Alpha Multi has all the benefits of the original Alpha; including the same short web path and quick job change, yet features two yet features two 'stacks' and can print up to 9 colours in a footprint of just 5m².

The unique twin stack arrangement has the added benefit of allowing one stack to be in production whilst the second is being made-ready.

The Alpha and Alpha Multi are both capable of converting a wide variety of label, packaging and ticketing substrates and are available with an extensive range of options designed to enhance their already high specifications.

Both presses offer all the benefits of a conventional modular press but at a fraction of the price, making both machines ideal for those new to the flexographic process, as well as companies looking for improved productivity and profitability from today's short run lengths.

Each Edale machine can be custom built to the individual customer requirements, whether by incorporating modifications or by developing an entirely bespoke machine, and is designed to be fully upgradeable should the customer require additional features in the future.

Features and Benefits:

- Compact design of just 2.5m² (Alpha) and 5m² (Alpha Multi)
- Short web path of less than 12m (Alpha) and 23m (Alpha Multi) minimises material waste
- Quick job change through ease of access, ergonomic design and 'tool-less' operation.
- Modular design ensures that a wide range of value added options can be retrofitted
- Material calliper adjustment provides the ability to run a wide range of label, packaging and ticket substrates from 50-250 micron
- Three nip tension control ensures excellent registration stability
- UV or water based ready
- Die conversion kits ensure that almost all press manufacturers' tooling can be used

Contact Hambleside for more information on Flexo web.

Need MACHINE PARTS Fast?

Locating spare parts for your printing machinery need not be a problem. We know that machinery down-time costs you money. So at Hambleside we aim to turn around your urgent spare-part orders within 48 hours of the order being confirmed - as long the parts are available from the manufacturer. They are dispatched by Courier, and because we export such high volumes of goods and equipment, they provide us with really competitive rates so that you pay the absolute minimum for your urgent consignments. When ordering parts it is essential that you give us as much information as possible including the part number. If you give us accurate information at the beginning, the quicker we can locate the parts to get you back in production.

AFFORDABLE DIGITAL PRINT SOLUTION..

ECRM DPP 1200

The compact but powerful DPP 1200 Digital Printer

As reported in the last issue of Imprint, ECRM have launched a new digital printer suitable for short-run commercial work including brochures, business cards, menus, covers, posters, tent cards etc; with a very fast turnaround time.

Offering truly low cost print per each page, the new DPP 1200 is driven by the industry standard ECRM RIPmate, based upon the Harlequin RIP technology. Those businesses already utilising the ECRM RIP can upgrade their existing software enabling them to not to have to re-train their staff whom are already familiar with the current workflow software.

The DPP1200 uses conventional offset screening up to 175 lpi whilst standard ICC proofing tools can be used to create correlated colour between digital and offset output. As well as offering a digital solution to your print business the DPP 1200 can be used as a proofer prior to printing on an offset press.

We believe that this small but highly innovative digital product could have a big future in Nigeria. It is definitely the sort of machine that any print business could justify installing next to existing litho printing equipment in order to provide a fast and efficient short-run digital solution

For more information on the new ECRM DPP 1200 contact Hambleside

FOLIANT ORPHEUS Fully Automatic Sheet Lamination.

The Foliant Orpheus C530 and C760 represent a new generation of compact industrial single-side laminating machines with a high pressure pneumatic system and integral compressor. A touch screen puts you in easy control of sophisticated automation and the machine operates at up to 22 metres per minute.

Both Orpheus models are available in two configurations.

The semi-automatic version has automatic overlaps control and the fully automatic has a deep pile feeder. These small-footprint machines are built in two working widths, 53cm (B2+) and 76cm (B1+).

Suited to commercial printers the Orpheus and Taurus machines are of an industrial quality. Foliant also offer a range of B3 machines of lower cost but of equal quality, ranging from manually operated through to fully automated units.

Please contact Hambleside for further information and a quotation that will leave you wondering why you considered second hand machinery before.
