New Edale FL-350 Press Launches

The Edale FL-350 is a highly versatile servo driven flexographic label, film and ticket printing press, combining the finest print quality with innovative features ensuring high speed change overs, minimum downtime and minimum wastage.

Utilising the latest in servo technology it readily provides pre-register, autoregister and print length control features to achieve highest print quality whilst drastically reducing job change times and set up wastage.

The FL-350 also employs Edale's revolutionary Pit Stop Colour Change system which enables operators to complete a full colour change in less than 1 min 30 seconds per print station.

Hambleside are happy to advise on the various options available for the FL-350 and depending on a chosen specification the FL-350 can print on a varied range substrates such as label stock, transparent or opaque film, aluminium foil.

Main Features of the Edale FL-350:

350mm web width Pre-register system locates print cylinders in register before any substrate is used.

Job storage allows all production settings to be stored and recalled at a later date.

Inking and impression 'strike' feature allows print station to be set up with minimal material waste.

Independent servo driven converting stations with auto register.

On-press colour management facilitates rapid on press colour matching.

User friendly touch screen operator interface.

Hambleside can offer the Edale range at a Competitive price and are happy to arrange a demonstration at Edale's Headquarters a few miles away from the Hambleside office in Waterlooville.

Please contact Hambleside to discuss your requirements.

NEW OPPORTUNITY NEW SALES CONTACT

Hambleside would like to announce, Mr Craig Guy as newly appointed Print Sales Administrator for Hambleside Limited in the UK

Craig's new role will be focusing and developing on our important Nigerian and Ghanaian markets, he will be visiting the region twice yearly around March & September starting in 2012.

You can contact Mr Craig Guy on +44 2392 354930 or via e-mail: craig.guy@hambleside.co.uk to arrange a meeting or to discuss your business printing needs.

Xerox DC560

NewsMax CTP System

Dumor Corner Rounder

LITHOTEC LIMITED *Xerox DC560 Digital Press.*

Lithotec Limited has recently invested in a brand new Xerox 560 digital press at their office in Lagos, Nigeria. Mr Craig Guy from Hambleside limited recently visited Lithotec to install and commission the machine along with training for their key staff.

Mr Aderibigbe the Managing Director of Lithotec was delighted with the company's new investment and the results that the machine can achieve. The Xerox 560 is an ideal start for any business who wishes to enter the digital market for the first time.

It offers instant prints without the need for plates or film and also has a variety of finishing options such as booklet making, folding, 2/4 hole punching and stapling online.

Turnaround time on jobs is significantly improved over litho printing and is ideal if you need a hundred or so reports for a board meeting. If a customer has requested a large print run of 15,000 urgently then the Xerox can offer 5,000 prints in quick time to tide over the customer until the full run is completed.

The remainder could be printed on a litho Press for delivery later on.

The Xerox 560 offers a wide range of media such as Full Colour Business Cards, Invitations, Reports, A3 and A4 Posters, Saddle Stitched Booklets, Photographs, NCR sets, labels and much more.

The Xerox 560 is fully capable of printing on a range of stocks from 60gsm to 300gsm on Uncoated, Coated, Silk, NCR and Gloss with a maximum print size of SRA3 (A3+).

Hambleside have agreed to offer technical support and consumables as part of the package and will keep the team at Lithotec up to date of any developments.

For further information on the Xerox 560 digital press then please contact Hambleside International on +44 2392 354930 or e-mail export@hambleside.co.uk

Need MACHINE PARTS Fast?

Locating spare parts for your printing machinery need not be a problem. We know that machinery down-time costs you money. So at Hambleside we aim to turn around your urgent spare-part orders within 48 hours of the order being confirmed - as long the parts are available from the manufacturer. They are dispatched by Courier, and because we export such high volumes of goods and equipment, they provide us with really competitive rates so that you pay the absolute minimum for your urgent consignments. When ordering parts it is essential that you give us as much information as possible including the part number. If you give us accurate information at the beginning, the quicker we can locate the parts to get you back in production.

NEWSmax CTP For Newspapers

The ECRM NEWSmax CTP system is now available through Hambleside and is a fully automated Computer to Plate application for newspaper production. ECRM have also recently announced a joint agreement with German CTP manufacturers Dotline GmbH. This has resulted in the ECRM NEWSmax CTP with Dotline's Technology to produce high quality plates at a resolution of 1270dpi with an amazing speed of up to 400 per hour. ECRM even quote it as "the worlds' fastest CTP solution".

Being fully automated ECRM also boasts that it requires less operation interaction by means of on online conveyor as standard and also a high capacity trolley capable of handling up to 1,000 plates at any given time. Lastly the machine can be operated in normal daylight conditions so there is no need for a dark-room environment.

Production sizes accommodate web widths to a maximum size of 640mm x 930mm and utilises 120mv violet laser technology.

For further information on the NEWSmax CTP then please contact Hambleside International on +44 2392 354930 or e-mail export@hambleside.co.uk
