Academy Press PLC - Muller Martini Acoro A7

Academy Press PLC in Nigeria have recently acquired a new fully automatic perfect binding line at their factory based in the Ilupeju district in Lagos. Installation began at the factory around mid January and completed in February.

This was installed by Muller Martini with support from the engineering team at Academy Press PLC.

The Muller Martini Acoro A7 is capable of producing an astonishing 7,000 perfect bound books an hour.

This state of the art binder is equipped to deal with the vast output of work that Academy Press produce and therefore dramatically increases production rates.

The A7 is user friendly and comes with a single interface called the commander touchscreen where the production run can be setup and configured from one place.

All adjustments can be made on-the-fly without stopping production therefore eliminating unnecessary downtime.

Muller Martini has incorporated an intelligent system for the Acoro A7 for when paper or cover jams occur in the finishing process. It can identify a jammed book and drop it onto a waste conveyor without having to stop the rest of the machine from running.

Other Features include a milling station, spine preparation station, 2 spine gluing stations, infra-red dryer, side gluing unit, optional mull station, spine and side glue premelters, drum feed over, pressing station and much more.

For more information on the Muller Martini Acoro A7 or other ranges then please contact Hambleside International.

HAMBLESIDE VISITS LAGOS - APRIL 2012

Hambleside International Director Ivor Hutchinson and Sales Administrator Craig Guy will be visiting Lagos around mid-April 2012 for 2 weeks.

If you would like to arrange a meeting to discuss any print requirements you may have, then please contact us on the telephone number below.

We can supply a number of different machines and printing consumables at competitive rates and we would be delighted to hear from you.

As an introduction we will offer a FREE Maglite Torch with a case for the first 10 customers to arrange a meeting, this will be hand delivered at your appointment.

To book an appointment now please call +44 2392 354930.

We look forward to hearing from you!

Main Features in this quarter

Muller Martini Acoro A7

Dumor Digicard Cutter

Eurofold Touchline CF375

Drupa Exhibition 2012

Dumor Digicard SRA3

Dumor Digicard SRA3 MKII

The Dumor SRA3 Card cutter is an ideal solution for small to medium sized printers and will easily compliment a digital press environment, where quick turnarounds are crucial for anyone wanting a hand full of business cards, photographs or even postcards.

The Dumor SRA3 Card cutter can accommodate weights from 180-300gsm without the hassle of manual adjustments and is also pre-programmed with five standard card size settings.

Features include:

- Computer chip controlled so you can change the format at the touch of a button, no tools needed.
- Five standard pre-programmed card sizes.
- Standard fitment mark reader for automatic self adjustment on-the-fly for compensation of variable image drift.
- Adjustable gutter cut length and card length by up to ± 2 mm for custom length cards. Adjustable first and follow on cuts by up to ± 2 mm.
- Handles card stock from 180-300 gsm no adjustments are needed.
- Feeds most kinds of stock, special feed rollers and separator ensure no double feeds or marking.
- Self compensating for paper density and thickness.
- Processes up to 4,5 sheets per minute.
- Cutting precision better than 0.1 mm.
- Long lasting slitter wheels and cross cutter blade.
- Replacement of blades is quick and easy.
- Optional perforating or scoring tools available with a separate cassette.

For further information on this offer please contact Hamble International on +44 2392 354930 or e-mail export@hambleside.co.uk

EUROFOLD Touchline CF375

The TOUCHLINE generation offers more flexibility and automation than any other product in its class. The Eurofold Touchline CF375 handles paper stocks up to 400 gsm, creases and folds the products, all in one single pass. It employs the unique Swing-Bar System for creasing without cracking and so that the sheets don't stop during the creasing process.

The automated setup of the crease depth with different positions is another fantastic feature of the Touchline CF375. This new technology allows for the speeding up of the creasing process with an accuracy of 0.1 mm.

The folding section uses Multigraf's patented Pro-Knife System. It was designed to achieve a perfect folding process but also to avoid marking and scratching on the products.

These electronically controlled knives are also used as deflector bars, contacting the leading edge only. Due to the extra large diameter fold rollers, there is no deformation on the folded products at all. By using this technology, the CF375 runs at a consistent speed of more than 6000 A4 sheets per hour, regardless of the number of creases and folds applied.

It is equipped with a pile feeder using vacuum belt technology, air knife control for a perfect sheet separation, and double sheet detection. There is no additional pump needed. This offers less noise emissions in a print room environment. The maximum sheet size is 375 x 650 mm (optional table extension available).

For further information or for a more detailed specification on the Eurofold CF375 then please contact Hamble International on +44 2392 354930 or e-mail export@hambleside.co.uk

Hambleside Parts & Consumables

Hambleside can offer a huge range of printing consumables for all major ranges of printing manufacturers from pre-press to post press. We can supply high quality parts for AGFA, Heidelberg, Komori, Goss, Manugraph DGM and many others to vast to name. Hambleside will always achieve the best rate possible by using our worldwide supply network.

Locating spare parts for your printing machinery need not be a problem. We know that machinery down-time costs you money. So at Hambleside we aim to turn around your urgent spare-part orders within 48 hours of the order being confirmed - as long the parts are available from the manufacturer. They are dispatched by Courier, and because we export such high volumes of goods and equipment, they provide us with really competitive rates so that you pay the absolute minimum for your urgent consignments. When ordering parts it is essential that you give us as much information as possible including the part number. If you give us accurate information at the beginning, the quicker we can locate the parts to get you back in production. So if you need anything from a spare part to inks, plates and finishing consumables then contact Hambleside now to discuss your requirements. Next time you need supplies, think Hambleside International first!
