An Affordable Metal Plate CTP Solution

Glunz & Jensen PlateWriter 2000 an Inexpensive alternative to film and conventional plates and processors.

The Glunz & Jensen PlateWriter 2000 is the industry's first inkjet Computer-to-Plate system capable of producing press-ready aluminium plates without the use of chemical processing. The PlateWriter 2000 inkjet Computer-to-Plate system is an innovative technology that sets new standards in the cost, flexibility and speed of offset printing for small to medium format printing. If you are looking to reduce the cost of your pre press operations, or simplifying your whole plate making process then please contact us to discuss your requirements in further detail.

Key Benefits:

- Affordability – Significantly lower investment than the cost of current, laser-based plate imaging systems
- Ease-of-use – Operates in daylight conditions; no pressroom changes are required to plate clamping or press chemistries. Reduction in plate production costs. The cost per plate is less than the cost of conventional metal platemaking methods.
- Able to print plates in the same room as the printing press, rather than being in a separate room.
- NO Chemicals required and loads more reliable than conventional platemaking
- High quality output – FM or stochastic screening capable of emulating 175 conventional line screening
- Flexibility – Any plate size in 2-up formats, wide range of thicknesses from 0.15 to 0.20 mm (0.006 to 0.008")

Welcome Stephen Harris

Stephen Harris
International Sales Manager
Hambleside Ltd

We would like to welcome the latest member to the team, Mr Stephen Harris with over 30 years experience of the printing industry.

Stephen will be concentrating on the important Nigerian and Ghanaian markets and will be a regular visitor to the region.

"Today's printer faces more challenges than ever before: increased pressure to do more with less, hold down costs, improve print quality and produce jobs quickly to meet tight deadlines. To successfully control these challenges and create a competitive advantage, the printer must carefully select the right products and supplier to work with, Hambleside has the products and technical support to do this".

Call or e-mail Stephen to arrange a meeting to discuss your business printing needs.

Blankets and Roller Washes

While many substitute blanket and roller washes in the market have a slightly higher price per litre. Hambleside have a range of washes at competitive prices to meet different requirements, working with Hambleside and training press operators on the most effective way to use our washes, you can reduce your labour costs, paper usage, maintain better printing roller condition and therefore reduce the total cost of using blanket and rollers wash for your company.

It's the cost of paper usage and make ready's that really make the difference. For example a printer using a low priced roller and blanket wash, when cleaning a blanket will take longer, probably the wash does not evaporate quick enough or requires more wash to clean and leaves an oily residue, also you use more paper when starting up printing due to the colour loss or gain on the printed sheet. This is more noticeable on multi-unit colour presses. Together this is more costly.

For more information on getting the best roller and blanket wash for you, **Please contact Stephen Harris by e-mail at stephen@hambleside.co.uk**

Academy Press visits our Hambleside UK Offices

Babs Fashanu (ED Sales and Marketing Academy Press PLC) and Bolaji Badru (Sales Manager Academy Press PLC) took time out to visit Hambleside during their visit to the UK in October. Academy Press PLC (Click here to visit) will be celebrating 50 years of printing in 2015 and we congratulate them in advance on this wonderful achievement.

A Wide Choice of Paper

Paper choice is very important in achieving that finished result. Some papers will give you quick drying capabilities and great run ability, great performance on press which allows you to deliver the job to your customer on time. You may need a paper that will reproduce colours tastefully with bright mouth-watering clarity that creates taste and emotion in the viewer's eyes, digital or Litho, or Papers with excellent stability on press and folding properties.

Litho machines can use a much wider variety of paper stock than digital machines. We can give you good advice and send samples. We could possibly offer you a better price and better paper product than you are currently using.

So get in front of your competitors now! The choice of paper is important to the finished result. Hambleside have been supplying high quality paper to printers and paper merchants of West Africa for 40 years.

Microboards G4 Disc Publisher

Microboards' latest innovation makes the process of producing professional CDs and DVDs in mid-to-high volumes effortless.

Anyone can easily operate the device with its intuitive user interface. Set it up, walk away and the 50-disc capacity enables automatic unattended burning and printing of all your discs. Disc-Place Technology provides improved loading and reliability;

and with easy disc alignment calibration, you can count on the G4 to meet your demands for reliable operation.

Microboards Publishers all come with network software included. With PrintWrite 2 software, PC users can put the G4 Publisher on the network, and even share it across several departments, enabling professional disc publishing across the enterprise.

SureThing label design software enables users to create labels with a professional flair. And whether you're printing full-colour, full-coverage discs or light coverage with text-only, you'll enjoy results of the highest quality.

Our 4th-generation disc handling technology provides smooth, clean images; and HP inkjet technology, with consistently brilliant colour—in text and images—on each and every disc. A Blu-ray version of the G4 disc publisher is also available, with 8x recording speed. The G4 Blu-ray version also records and prints DVDs and CDs.

Parts & Consumables

Hambleside offers a huge range of quality printing consumables for all major ranges of printing manufacturers from pre-press to post press. We can supply high quality parts for AGFA, Heidelberg, Komori, Goss, Manugraph DGM and many others to vast to name. Hambleside will always achieve the best rate possible by using our worldwide supply network.

Locating spare parts for your printing machinery need not be a problem. We know that machinery down-time costs you money. So at Hambleside we aim to turn around your urgent spare-part orders within 48 hours of the order being confirmed - as long the parts are available from the manufacturer. They are dispatched by Courier, and because we export such high volumes of goods and equipment, they provide us with really competitive rates so that you pay the absolute minimum for your urgent consignments. When ordering parts it is essential that you give us as much information as possible including the part number. If you give us accurate information at the beginning, the quicker we can locate the parts to get you back in production. So if you need anything from a spare part to inks, plates and finishing consumables then contact Hambleside now to discuss your requirements. Next time you need supplies, think Hambleside International first!
