The great benefits of the Heidelberg MO

The Heidelberg MO offers the choice of many different machines with the durability and same paper sheet size of the Kord 64, versatility of the Heidelberg GTO and the Productivity of a Heidelberg Speedmaster.

The Heidelberg MO printing machine with its paper sheet size of 48cm x 65cm (19 inch x 25 1/2 inch) comes in 16 basic models from one colour presses to 6 colour presses and can print up to 11,000 sheets per hour. Flexibility and productivity make the Heidelberg MO presses very economical printing machines for any printer. For the small printer this machine simplifies the step into multi colour printing, for the larger printer they can produce a considerable amount of work that would over load other print machinery.

Two different feeder systems are available on the MO press. The single sheet feeder for very quick easy changeover of paper sizes or the stream feeder which is fast and non stop. Some presses come with perfecting units offering the ability to print on both sides of the paper in one pass through press and perforating units on them offering great versatility. Certain models also come with the ALCOLOR dampening units that operate with very little water and keeps the ink water balance very stable from the first printed sheet to the last printed sheet.

The MO inking unit, is easy to maintain with enough rollers to ensure uniform inking no matter how difficult the image. The results give perfect printed dots and solids to produce great quality work. One thing that stands out among the winners in the print market is the print equipment they have. Yes, they all put ink on paper, but what are their customers buying? — They are buying something that is printed in better quality and can be produced quicker. This is one good reason to consider investing in a used Heidelberg MO press.

Need MACHINE PARTS Fast?

Locating spare parts for your printing machinery need not be a problem. We know that machinery down-time costs you money. So at Hambleside we aim to turn around your urgent spare-part orders within 48 hours of the order being confirmed - as long the parts are available from the manufacturer. They are dispatched by Courier, and because we export such high volumes of goods and equipment, they provide us with really competitive rates so that you pay the absolute minimum for your urgent consignments.

Hambleside Lagos Open Day 'Listening to our Customers'

Printing Industry delegates from around Lagos attended the lively Hambleside Lagos office open day event on Wednesday 22 April.

Following the companies historic 40 years of selling into West Africa this open day gave visitors the opportunity to discover the benefits of working with Hambleside International and discover how Hambleside could save them money.

Hambleside presented visitors with a number of ideas on how to take advantage of the latest technologies available like CTP and the benefits of some of the latest used printing equipment available. Ivor Hutchinson director of Hambleside and Stephen Harris, Hambleside's International Sales Manager from the UK office, welcomed the opportunity to meet with customers and visitors, they were delighted with the interest generated, and received many new enquires to pursue.

Stephen Harris said "We know we are good at what we do. It was nice to hear this from our customers, we were delighted with the number of visitors that attended the open day, a clear indication of the value that Hambleside can offer the print industry in Lagos".

"All visitors commented about the importance of print information and having direct contact with print industry experts. We're equally delighted about enquires we received at the event".

Refurbished Large Format Printers

At Hambleside we only select the best used and refurbished Large Format Printers to be resold. All printers are thoroughly tested and checked before shipping.

We currently have access to 50 refurbished machines, from HP, Epson, Canon all at great prices. Our stock availability changes weekly so please call us with your requirements. For very little cost you could be adding another print service to your business.

For pricing and availability, please contact us on:

Hambleside Ultimate 2-in-1 Fountain Solution

The traditional approach of mixing alcohol and fountain solution together may soon become a thing of the past. Hambleside have a fount that eliminates the use of I.P.A Alcohol fountain solution.

Stephen Harris our International Sales Manager describes the Hambleside fountain solution and alcohol combination, branded '2 in 1', as a great product. A lot of printers like the idea of using alcohol, because of the better wide

ink water balance on older presses and how they were set up at the start.

If you are looking at getting away from alcohol solutions altogether, some alcohol free or low Alcohol fountain solutions can cause a lot of everyday problems on press with printers.

The Hambleside 2 in 1 fount is the only FOGRA fountain solution and alcohol combination specifically designed for offset printing to achieve better dampening. It works with a wide range of inks including UV inks, prints sharper, brighter colours uses up to 10% less ink, and helps against plate wear.

Make readies are quicker, because of the faster colour balance between changeover of jobs, and clean back cylinders. Not only will it eliminate your Fount solution and Alcohol. You only need one stock chemical instead of two eliminating the storage of Alcohol on your premises and reduce the operator error in mixing up founts with Alcohol and fount.

Also the 2 in 1 fount does not require the cleaning out of the damp systems as often compared to other products. If you do not try this product you will never know how good it is, and how much money it will save your company eliminating both Alcohol and fountain solution whilst giving better print production.

Need Film & CTP Plates?

Hambleside offers a huge selection of popular Agfa Film / Plates, Kodak & Fuji Plates. Please contact us with your enquiry on +44 (0)2392 354930 or stephen@hambleside.co.uk

Optimising the performance of your printing press

Printers often face problems on the press. Most involve incompatibility between the inks and fountain solutions.

Good suppliers of pressroom chemicals like Hambleside find innovative ways to make their products work more effectively, finding ingredients and combinations of ingredients that do the job more efficiently and economically.

Most problems on press are due to Ink/water balance. As the Printing process relies upon a stable ink and water balance.

The following problems can occur with the wrong choice of fountain solution

- Increased dot gain, scumming
- Picture framing on blankets
- Background tinting on plates
- Poor ink drying and scuff resistance
- Increasing the amount of water during the run
- Plate wear
- Difficulty in controlling ink water balance

Getting the fount right can make a huge difference in helping you get more from your printing press.

We can offer you a 2 in 1 fount solution that replaces I.P.A, reduces the operator error in mixing fount chemicals, Reduce V.O.C in the press room. You then only need to stock one chemical instead of two, also eliminating storing neat I.P.A alcohol.

This product eliminates the need for a separate fountain doser on press. Less chemicals to mix on hand mixed presses. No other fountain solution required - JUST ADD WATER !

The advantages, inks setting 10% down saving, Faster drying times, faster set up and colour balance.

Giving you reduced ink costs, faster make readies, brighter colours, less waste, operator mixing errors and less chemical mixing.

Looking for Heidelberg Refurbished circuit boards?

Hambleside International now offers high quality refurbished Heidelberg circuit boards. Hambleside Heidelberg refurbished circuit boards offer increased long term better value, over our competitors, offering reduced replacement costs and giving new life to your Heidelberg Press.

For more information please contact our International Sales Manager: Stephen@hambleside.co.uk

Our range of inks will ensure optimum print quality.

If you're looking for high-performance, commercial sheetfed inks that can be used in a wider range of applications, consistently deliver a higher quality, and exhibit more precise balance strengths for colour control, while substantially reducing start-up times, waste and maintenance costs, look no further. Hambleside is your best choice for sheetfed ink solutions.

Our commitment to you is to continually seek new ways to increase your production efficiency, enhance your profitability and offer competitively priced products.

Our range of inks will ensure optimum print quality. We offer inks that are highly pigmented ensuring excellent graphic reproduction and press performance. Inks with improved rub resistance offering better handling in the finishing department.

Hambleside is proud to offer technical support and ink choice advice. Please contact us with your enquiry on +44 (0)2392 354930

Hambleside should be your clear choice

We have been assisting commercial printers for over 40 years in West Africa, giving Hambleside International the experience that matters when you are purchasing your next piece of printing equipment.

Operating in the supply of used and reconditioned printing equipment for so many years, has given us the opportunity to develop outstanding relationships with major used equipment suppliers here in the UK and worldwide.

This relationship has allowed us to have first knowledge of equipment currently available

and coming available at end of lease.

Collectively, we have a large choice of equipment available to offer you that our competitors have not.

We can provide you with used pre-press equipment, offset printing equipment or finishing equipment, that will best meet your needs now and in the future, which can be offered with training, installation and warranty.

It is best to contact us directly with your equipment needs as we can only advertise a small amount of equipment available on our website.

We look forward to helping you!

Affordable Digital Print Solution.. ECRM DPP I200

The ECRM is a digital printer suitable for short-run commercial work including brochures, business cards, menus, covers, posters, tent cards etc; with a very fast turnaround time.

Offering truly low cost print per each page, the new DPP I200 is driven by the industry standard ECRM RIPmate, based upon the Harlequin RIP technology.

Those businesses already utilising the ECRM RIP can upgrade their existing software enabling them to not to have to re-train their staff whom are already familiar with the current workflow software.

The DPP I200 uses conventional offset screening up to 175 lpi whilst standard ICC proofing tools can be used to create correlated colour between digital and offset output. As well as offering a digital solution to your print business the DPP I200 can be used as a proofer prior to printing on an offset press.

We believe that this small but highly innovative digital product could have a big future in Africa. It is definitely the sort of machine that any print business could justify installing next to existing litho printing equipment in order to provide a fast and efficient short-run digital solution

For more information on the new ECRM DPP I200 contact Hambleside on +44 (0)2392 354930

The compact but powerful DPP I200 Digital Printer

FULLY RECONDITIONED, QUALITY, USED PRINTING EQUIPMENT

All our machines are offered with installation and training. Whilst our extensive UK and International database allows us to source and immediately acquire a quality machine to your specification. So if you are in the market for a used printing press, pre press equipment or finishing equipment, Next time you are looking to purchase printing or finishing machinery then think Hambleside International first.
